Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8-11, 13-16, 29 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Taguchi (5,463,716).

As to claim 1, Taguchi teaches a method for determining spectral peak information, the method comprising the steps of:

Receiving a current frame of speech, where the speech signal is split in to plurality of bands using band pass filters;

Determining filter coefficients for the current frame; and

Determining the peak for the speech signal (Figs.1, 5; Co.1, lines 45-50).

As to claims 2-6, Taguchi teaches where the process is performed for consecutive frame of speech signal and where the power is calculated (Col.2, lines 13-27).

Claims 8-11, 13-16, 29 and 31 are analogous to the claims addressed above and are rejected by Taguchi for the foregoing reason.

Allowable Subject Matter

Claims 18-28, 32-36 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claims are allowed because, Taguchi doesn't teach the step of augmenting a current feature vector as recited in the claim

Claims 7, 12, 17 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
